KOREAN INTELLECTUAL PROPERTY OFFICE  
NOTIFICATION OF OPINION

Applicant: Name: Kabushiki Gaisha Murata Seishakusho<sup>ii</sup> (Applicant Code: 519980960646)  
Address: 26-10, Denjin 2nd Street, Nakaokakyo, Kyoto, Japan

Agent: Name: Dong-Yol Yoon and one other  
Address: #901 Yeosam Building, 648-23 Yeoksam 1-dong, Gangnam-gu, Seoul

Application Number: 10-2001-0082648

Title of Invention: A Superface Acoustic Wave Device and Its Manufacturing Method

This is to inform you, pursuant to Section 63 of the Patent Law, that a review of this patent application resulted in the following grounds for rejection. If you have an opinion regarding this or if the application requires correction, please submit a written statement of opinion (Accompanying Document Form No. 25-2 of the Enforcement Regulation of the Patent Law) and/or an amendment (Accompanying Document Form No. 5 of the Enforcement Regulation of the Patent Law) by the deadline above. (Applications for extension of the deadline above may be filed for one month at a time. No separate extension approved notification is provided regarding such an application.)

(Grounds for Rejection)

The invention described in all claims of this application is unpatentable pursuant to Paragraph 2, Article 29 of the Patent Act because, prior to this application, a person with ordinary knowledge in the technical field to which this invention belongs could create the invention easily based on the information provided below.

1. All the claims in the Scope of Claims in the invention of this application relate to a superface acoustic wave device and its manufacturing method, wherein [the method] is comprised of a phase of preparing a piezoelectric substrate, a phase of forming the electrode layers, a phase of forming wiring electrodes, a piezoelectric substrate, electrodes for a device, electrode pads, wiring electrodes, etc. This relates to a manufacturing method of a superface acoustic wave device. On the grounds that [this method] is a combination of the cited invention No. 1 (Japanese Patent Application Kokai No. H01-103010) comprising piezoelectric substrate, electrodes, bonding pad, wiring electrodes, etc, and the cited invention No. 2 (Japanese Patent Application Kokai No. S63-127610) comprising a process of forming the electrode pattern on the surface of the piezoelectric substrate, a process of adhering with an adhesive, a process of forming metallic wires, etc., we believe that this business operator would be capable of inventing this application with ease.
